Instructions:

- 1. We recommend to use the glue on all threads (blue color – medium strong).**
2. Remove fairing of motorcycle.
3. Remove original bolts M10 from both sides and one bolt M8 from the right side of motorcycle.
4. Stick tape 3M between adapter and frame of motorcycle.
5. Fit steel adapters on the frame of motorcycle. Tighten it using bolts (ID6) and (ID13 – only right side). Add dural. cylinder (ID13) on the left side. Do not forget to place washers.
6. Insert dural. rod between adapters and tighten it using bolts (ID8)
7. Put fairing back.
8. In the end fit slider.
 - a. Prepare bolt (ID9) and put slider adapter (ID5), dural. adapter (cylinder – ID2), and dural cylinder (ID7) on it.
 - b. Fit this kit on the steel adapter.
 - c. Fit protector (ID1) on the slider adapter (ID5) using two bolts and washers (ID5 + ID3).
