### Assembly :

Install the left and right sliders in the bracket according to the photos below. Thread the adapters under the slider (ID.1), duralumin rollers (ID.4) and (ID.3) on both screws (ID.2) in exactly this order and mount them in the motorcycle frame. Finish one side first and then assemble the other. Then take the slider and mount the bolts (ID.5) with washers (ID.6) on the adapters that are mounted on the motorcycle.

**Note: We recommend using medium strenght thread glue for all bolts (blue color).**
